MESSAGE FROM THE CEO

Dear Friends,

As we reflect on the past year, we do so with deep gratitude and momentum. **Captain Planet Foundation directly engaged more than 40,000 young people across CPF programs worldwide**—a record number of young people—at a moment when climate and environmental challenges demand bold and authentic investment in youth-centered leadership and action. We also marked meaningful progress across our global network as our first class of Planeteer Alliance Regional Leaders in Canada, Ecuador, The Gambia, Kenya, Mexico, Nigeria, and the U.S. joined the team—creating a culminating step for young leaders who climb our Ladder of Engagement.

2025 was the year of WIND, which for CPF represents the circular economy—rethinking how we define waste and build systems where reducing, repairing, and reusing become the norm. At the same time, our Planeteers and programs continued to engage across the other elements—EARTH, WATER, FIRE, and HEART—recognizing that environmental challenges are interconnected and require integrated, systems-level solutions.

We launched the Project Learning Garden teacher certification, expanding professional pathways for educators and strengthening these onsite learning laboratories in the **785+ elementary schools** we serve across the U.S.

In Atlanta and Houston, **1,000+ middle schoolers participated in the Green Heart STEM Challenge** and developed innovative solutions to address single-use plastics, fast fashion, and electronic waste; with three (3) winning teams receiving mentorship & implementation grants to bring their projects to life.

Through the Planeteer Alliance, **young leaders convened 22 WIND Summits and 60+ other action-related events across 11 countries**. As a follow up to a UN Environment Programme grant, the CPF regional team hosted a six-month plastic policy intensive with 50+ youth across Ghana and The Gambia, culminating in policy recommendations being presented to their respective Ministries of Environment.

In parallel, we launched our 2025–2027 Strategic Plan, aligning our work around long-term impact, sustainability, and equity.

We are thankful for our staff, board, funders, partners, and supporters who all believe in the critical importance of youth leaders creating a climate-positive future for all. And we are especially grateful to our outgoing Board co-Chairs, George McKerrow and Randy Rudderman, for their steadfast leadership; and to our incoming co-Chairs, Christine Boucher and Maury Wolfe, for picking up the mantle.

As we look to 2026, we remain committed to meeting this moment with optimism, justice, and action—because the power is, and always has been, yours.

Leesa Carter-Jones
President & CEO

ABOUT CPF

Vision Statement

A global community of empowered young people who have the skills, knowledge, relationships, and agency to create climate-positive solutions for the planet.

Mission Statement

Captain Planet Foundation works collaboratively to engage and empower young people to be problem-solvers for the planet.

Working Principles

In all that the Captain Planet Foundation does, we prioritize and value these principles:

- **Youth Empowerment:** We believe in directly investing in youth leaders and capacity-building.
- **Collaboration:** We value and seek collaboration in all efforts.
- **Experience:** We believe that children benefit from experiences in nature and by learning from each other.
- **Justice:** We prioritize the need for an authentically equitable and just transition to a climate-positive future for all.
- **Optimism:** We celebrate fun, optimism, and empowerment to promote positive mental health in the face of climate disruption.

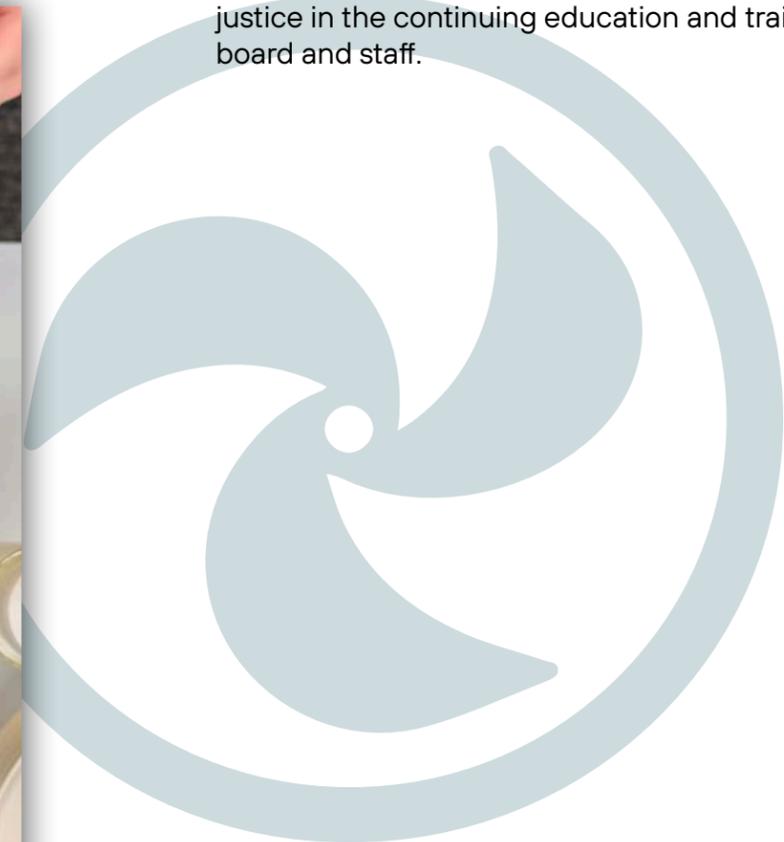

JEDI Statement

When the Captain Planet Foundation was founded in 1991, we committed to work for the planet. Justice, Equity, Diversity, and Inclusion (JEDI) are inextricably linked to this original intent and also to the show that influenced the founding of CPF—*Captain Planet and the Planeteers*.

FOR US, THIS MEANS OUR ORGANIZATION WILL:

- Represent the communities that we serve on our Board, Staff, and across all programs.
- Ensure that accessibility to all of our programs is prioritized.
- Accept our responsibility to give voice to and address the underlying systems that cause environmental injustice.
- Ensure that all programs specifically and actively invite and engage traditionally underrepresented and/or underserved communities.
- Celebrate and uplift the diversity of our youth participants.
- Commit to centering inclusion, diversity, equity, and justice in the continuing education and training of the board and staff.

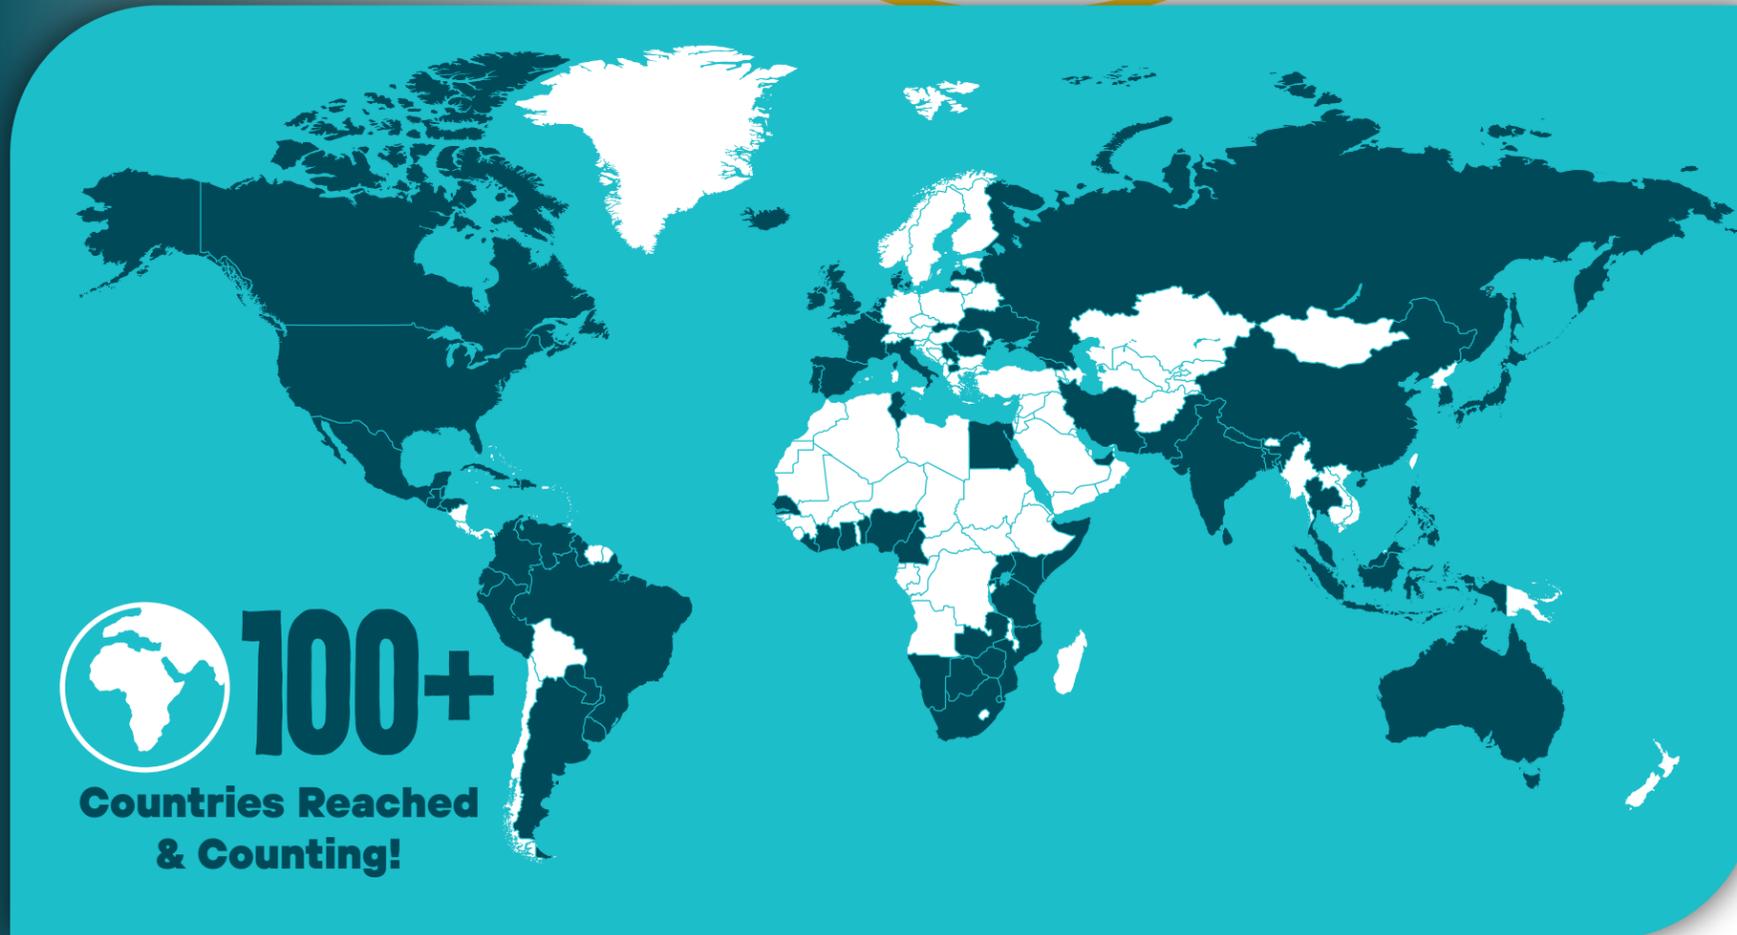

2001-2025 Overall
**PROGRAM
IMPACT**

EMPOWERING PROBLEM SOLVERS FOR THE PLANET

As young people acknowledge the truth of a climate-insecure future, the Captain Planet Foundation works with partners to develop the tools, resources, strategies, and opportunities that engage youth, connect them with their communities and environment, and empower them to be active global citizens and collaborative agents of change for the planet.

OUR PROGRAMS **EDUCATE,** **EMPOWER, & ENGAGE**

Project Learning Garden

Providing elementary schools with the essential elements to establish and support garden programs where students engage in inquiry-driven, project-based learning across all disciplines.

Green Heart STEM Challenge

Training and empowering middle school students to innovate and implement place-based solutions to the biggest local environmental challenges.

Planeteer Alliance

Activating and funding a global community of young environmental changemakers (ages 10-25) through youth-designed and youth-led trainings, resources, and collaboration.

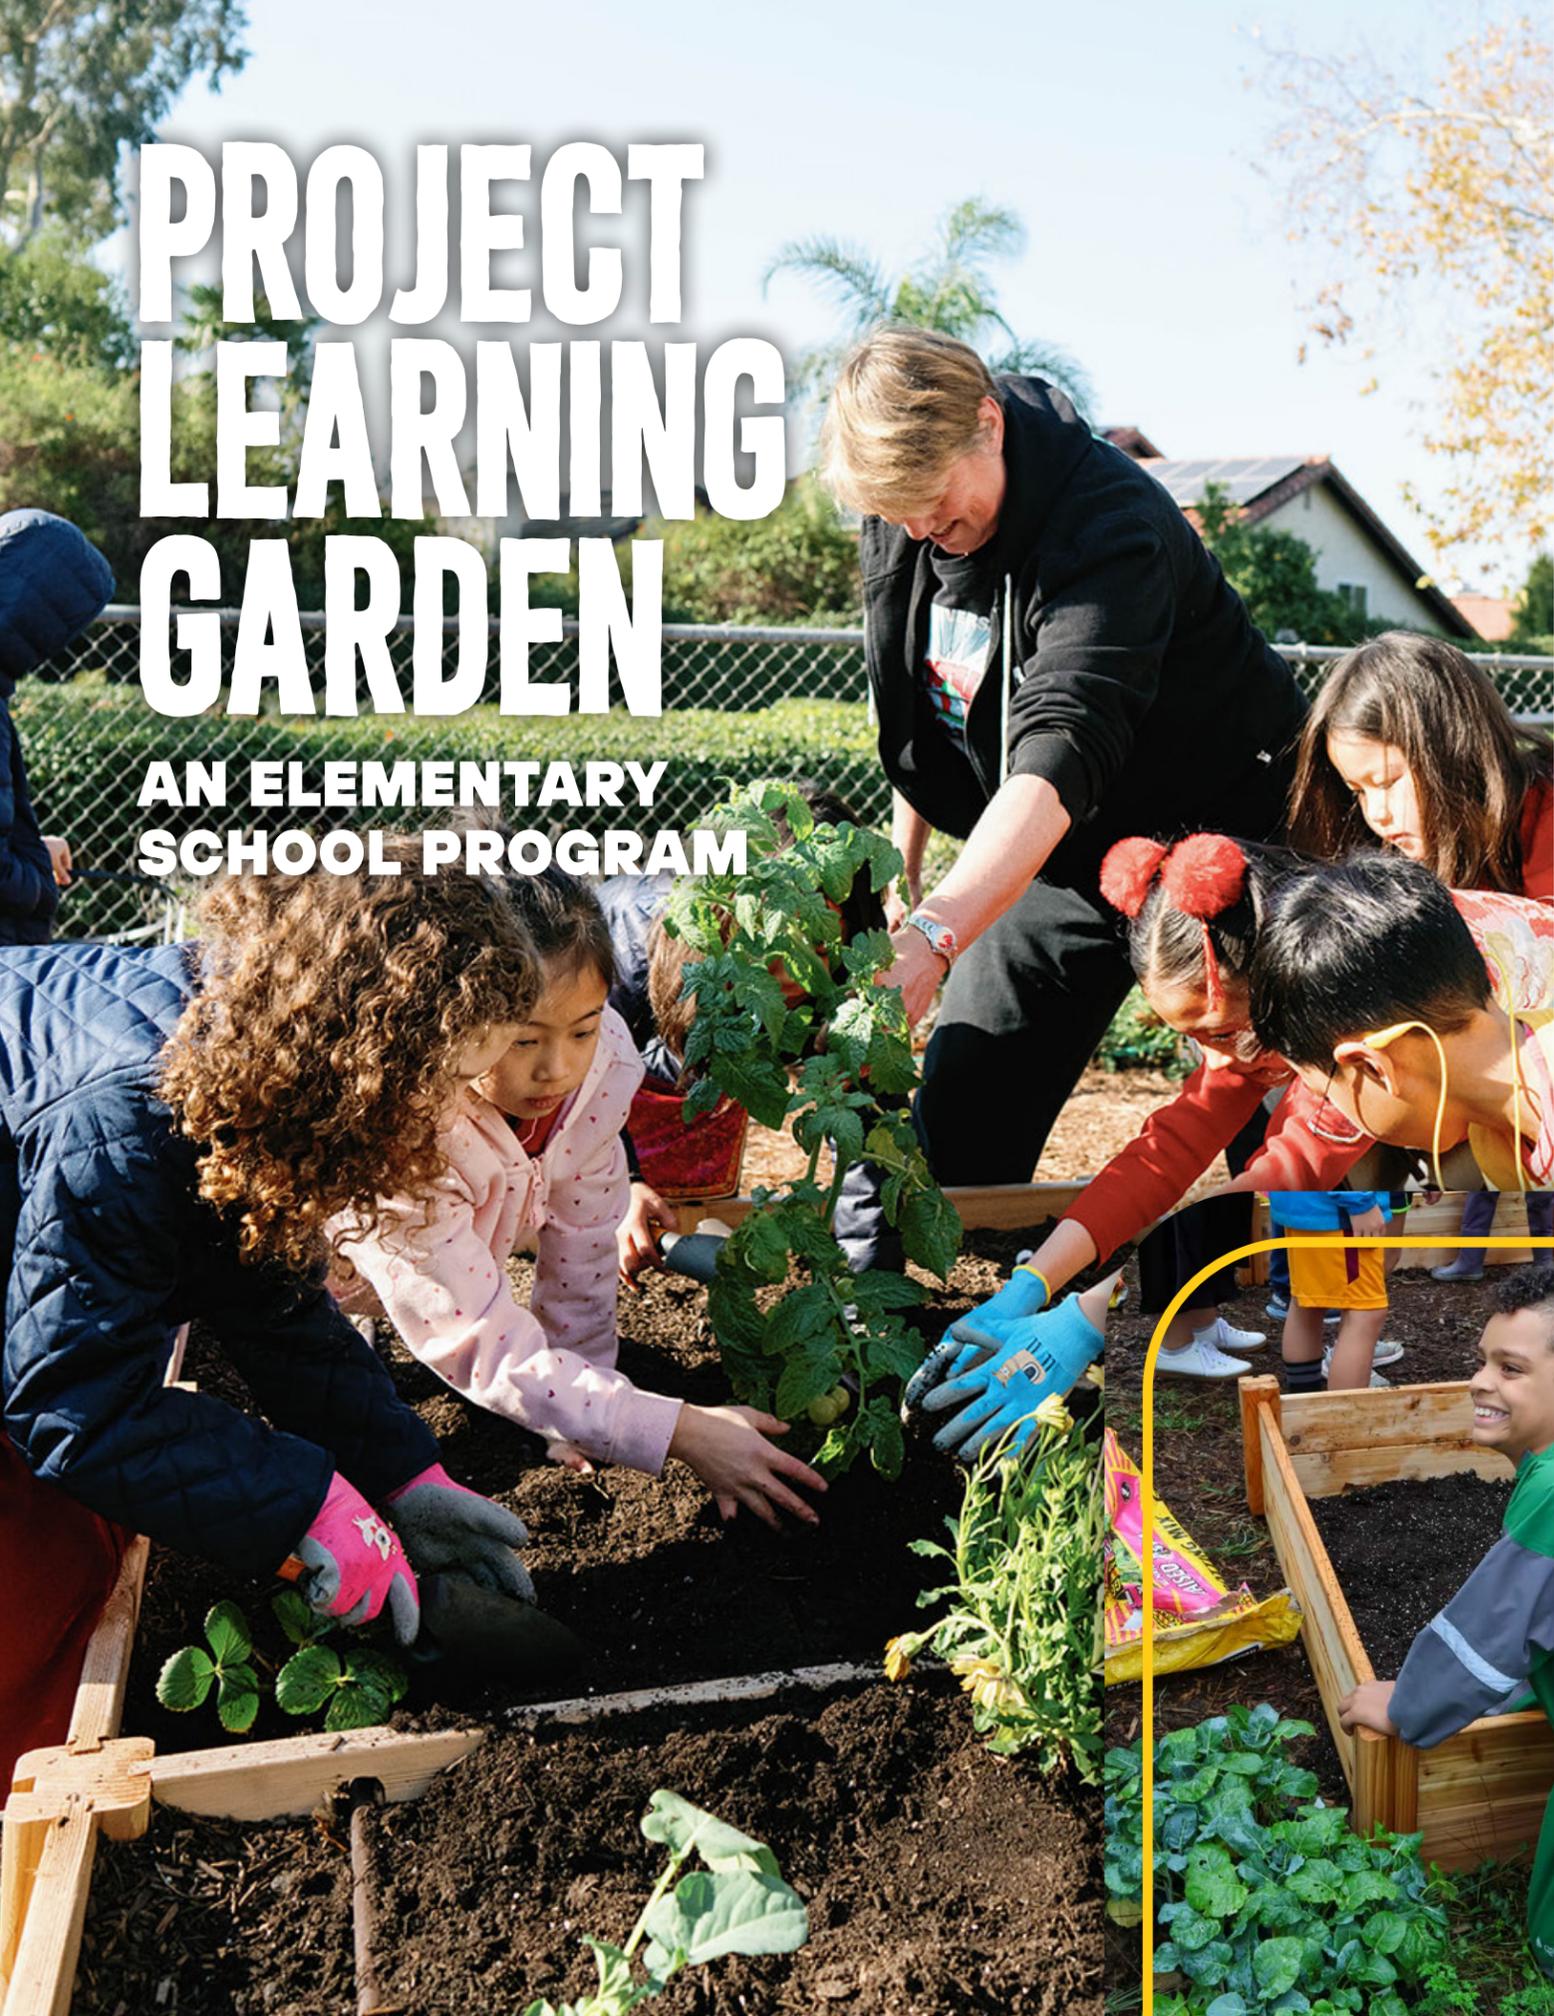

The Green Workforce

Planeteers are prepared to enter the workforce as climate-conscious leaders.

PROJECT LEARNING GARDEN

AN ELEMENTARY
SCHOOL PROGRAM

"Our school received the mobile cooking cart, and I am super excited to have this available for classroom use."

- Darlene, Teacher, Great River School, Minnesota

Project
**LEARNING
GARDEN**

Every Garden Is A Classroom

We believe it is **ESSENTIAL** for every school to have an on-site learning laboratory where ideas learned in the classroom come alive in the real world. From an early age, Project Learning Garden teaches students to grow food, develop a palate for healthy fruits & vegetables, build crucial interpersonal skills, and establish a strong ethic of community engagement.

In 2025, we introduced a teacher certification program with an inaugural cohort of 55 educators certified as "Gardeneers". This additional layer of support expands opportunities for educator professional development and student engagement, deepening the program's impact throughout its lifespan.

"It is a great offering to provide development courses for each level of PLG Educator Certification. Thank you!"

- Janie, Teacher, Grande Innovation Academy, Arizona

Project **LEARNING GARDEN**

"We had tremendous interest in our 'Get2Green Team' this year after installing our new PLG garden, with nearly 40 students signing up!"

- Linda, Teacher, Crossfield Elementary, Virginia

GREEN HEART STEM CHALLENGE

DESIGNING A SUSTAINABLE AND EQUITABLE FUTURE FOR ALL

Centering STEM in Environmental Education!

The Green Heart STEM Challenge is an annual activation that empowers middle school teams to explore and identify environmental challenges in their communities and to design and implement feasible solutions. Students advance through a competitive process, with ten finalist teams in each metro area pitching their ideas to a panel of judges. Winning teams participate in an Idea Incubator where they work with Accenture consultants to put their ideas into **ACTION by refining budgets, building project timelines, and earning implementation grants.**

In 2025, more than 1,000+ students across metro-Atlanta and metro-Houston explored environmental challenges connected to WIND (circular economy), with a special focus on electronic waste, food waste, fast fashion, and single-use plastics.

GREEN HEART STEM CHALLENGE

A MIDDLE SCHOOL PROGRAM

“It was very rewarding to see how excited and empowered the students felt having their ideas taken seriously and knowing that professionals (both from Captain Planet & the community) believed in them. It made all the difference.”

- Candice, Accenture Consultant

GREEN HEART STEM CHALLENGE

DESIGNING A SUSTAINABLE AND EQUITABLE FUTURE FOR ALL

"One highlight was seeing our students confidently present their fashion exhibit idea and connect it to a real-world issue like fast fashion. Their excitement, teamwork, and ability to speak with purpose showed just how much they had grown during the Idea Incubator experience. It was a proud and powerful moment."

- Mr. Meade, Educator, Clear Creek Intermediate School

Activating Global Youth For Climate Action

The Planeteer Alliance continues to ignite youth-led climate action worldwide, empowering young changemakers to confront the most pressing environmental challenges of our time. These global changemakers (ages 10-25) are: Passing environmental policies at the local, regional, and national levels; Holding governments accountable to enforce policies; Shifting supply chains within corporations, school districts, and campuses; Operating large-scale awareness & education campaigns; and leading peer-training Summits across the globe, and more!

In 2025, Planeteers hosted 105 events across the globe where they recruited and trained over 2,500 of their peers. In addition, CPF hired seven (7) young people—who came through the program—as Regional Coordinators in: Canada (Toronto), Central/South America (Ecuador), East Africa (Kenya), Mexico (La Paz), United States (Minnesota), West Africa-North (The Gambia), and West Africa-South (Nigeria).

PLANETEER ALLIANCE

PLANETEER ALLIANCE LADDER OF ENGAGEMENT

Ladder of Engagement

The Ladder of Engagement is the Planeteer Alliance's roadmap for tracking progress as a Planeteer. As a Planeteer climbs the ladder, they unlock new titles and badges, gain access to courses and resources, and become eligible for grant funding.

LADDER OF ENGAGEMENT

2025

BY THE NUMBERS

PLANETEER LEVEL

When young people decide to become active participant in designing the world they wish to live in, they join the Planeteer Alliance and begin climbing the Ladder of Engagement to learn the skills, access the resources, and build the community they need to be successful at shifting the systems that can create a climate-positive future for all.

In 2025, 700+ new users joined Planeteer HQ.

RISING LEADER LEVEL

The second step on the Ladder is to level-set their knowledge by completing the Planeteer Alliance Bootcamp Course and earned their Certificate in Climate Awareness & Campaign Strategy.

In 2025, 123 young people earned their Certificate

CAPTAIN LEVEL

Each quarter, young Planeteer leaders take their third step on the Ladder by hosting a small-scale event focusing on one element: EARTH (Q1), WATER (Q2), FIRE (Q3), or WIND (Q4). These events teach them the fundamentals of organizing such as: budgeting, marketing, recruiting, communications, and agenda-building.

In 2025, Planeteers hosted 62 Meetups in 9 countries, where they trained 855 peers.

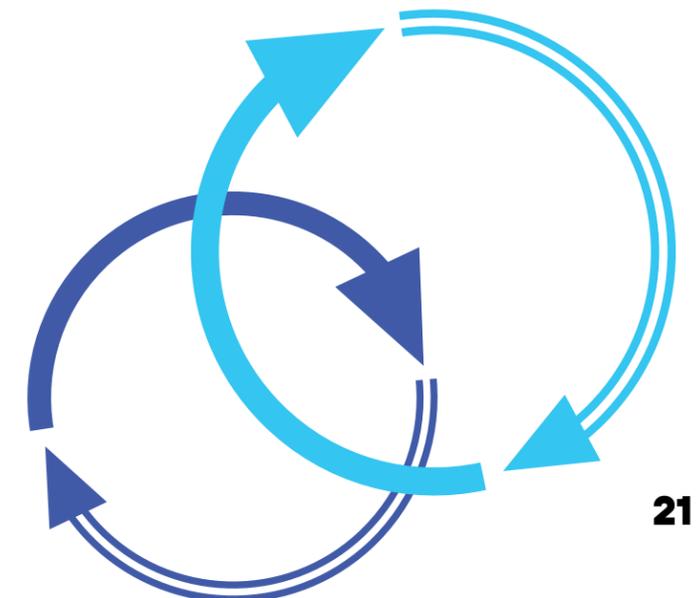

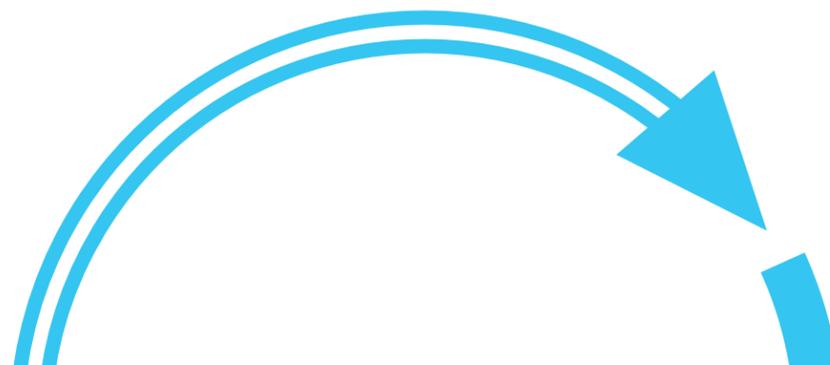

SUMMIT HOSTS AND/OR CAMPAIGN LEADER LEVEL

On their fourth step, Planeteers can opt to either host a large-scale summer Summit or they can submit a plan & budget for a Season of Solutions Campaign.

At this step on the ladder, they become eligible for travel scholarship grants and CPF passes to attend global and regional climate conferences. This ensures their voices can be heard and centered in decision-making rooms and they can build their business network as they move into work in the green economy.

See the pages below for highlights from youth impact at this level.

PLANETEER ALLIANCE

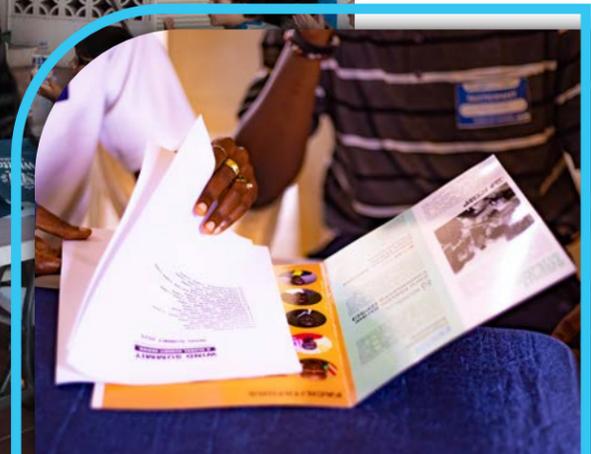

2025 WIND SUMMIT HOSTS

The Planeteer Alliance WIND Summits: *Circular Solutions for a Sustainable Tomorrow* brought together 1,340 young people from 11 countries across four continents to advance a vision of a world and economy rooted in reclaiming, repairing, restoring, reusing, recycling, and replenishing our planet.

With support from the Laura Turner Seydel Living Legacy Fund, 22 WIND Summit Host Teams received nearly **\$40,000 in grants** to offer expert-led sessions, workshops, community organizing training to youth participants around the globe.

Countries: Brazil, Cameroon, Ecuador, Ghana, India, Kenya, Mexico, Nigeria, Rwanda, The Gambia, USA

 PLANETREE ALLIANCE

SEASON OF SOLUTIONS

2025 SEASON OF SOLUTIONS

2025 SEASON OF SOLUTIONS GRANTEES

Nearly \$18,000 was deployed to support eight (8) youth-led climate action projects that impacted over 10,000 youth worldwide. These community-driven initiatives addressed critical environmental challenges, including waste management infrastructure, access to clean energy, reforestation, sustainable transportation, and indigenous conservation education. Together, these efforts empowered communities, created economic opportunities and laid the groundwork for scalable, locally-owned climate solutions and businesses.

 **4**
Countries

 **8**
Campaigns

 **\$17,600+**

2025 SEASON OF SOLUTIONS

SEASON OF SOLUTIONS

1 Earth Care Alliance Kigali, Rwanda

Herve and his team designed a campaign to heal the land and empower the people who depend on it. More than 100 community members were taught sustainable land management, introduced to terracing to fight soil erosion, and planted fruit trees.

2 Farato Clean Energy Generation Project Farato, The Gambia

Sanna and his team created a fully-functioning clean energy demonstration site where residents of Farato can see solar energy in action, ask questions, and imagine what's possible for their own homes.

3 E Town for E Bikes Eldoret, Kenya

Shem and his team built three electric bicycles and acquired an electric motorbike, laying the foundation for an e-mobility and affordable delivery and taxi service, supporting local businesses, farmers, and individuals.

4 Go Solar! Stopping Fossil Fuels La Fortaleza, Brazil

Maria and her team hosted educational sessions on solar energy, a hands-on solar workshop, clean-up events that doubled as awareness engagements, community meetings promoting sustainability and shared action.

2025 SEASON OF SOLUTIONS

SEASON OF SOLUTIONS

5 Lake Victoria Restoration & Action Kisumu, Kenya

Claudius and his team formalized recycling initiatives and created youth-led waste businesses to solve the plastic pollution crisis on Lake Victoria's shores and waters.

6 Project Kuwinda Kuwinda, Kenya

In the informal settlement of Kuwinda, on the outskirts of Nairobi, 5,000 residents have lived for years without access to a waste management system. Natalie partnered with local organizations—including Mviringo Africa and the Kibarazani Youth Group—to introduce practical, community-led solutions to waste management that could sustain themselves.

7 Rafiki Conservation Center Maasai Mara, Kenya

Ipato saw that younger generations have had fewer opportunities to learn about the deep conservation knowledge embedded in Maasai culture. Traditional stories, values, and practices that once guided sustainable living were at risk of being lost. The Rafiki Conservation Center is now a fully functioning space where Maasai youth can engage with elders, explore traditional conservation practices, and tell their own stories about what it means to care for the land and wildlife today.

8 Reforestation & Forest Health in the Gambia Sinchu Baliya, The Gambia

Sait Jallow led a powerful local project focused on reforestation and forest health. Through community education sessions and tree planting exercises, the campaign reached young community members who wanted to learn more and take action. Participants learned not only how to plant trees, but why it matters.

2025 GLOBAL CONFERENCE ATTENDANCE

2025 GLOBAL CONFERENCE ATTENDANCE

In 2025, Planeteer Alliance made a direct and intentional investment in youth leadership by funding youth representation across five high-level regional and global conferences. This support ensured that young people from across Africa, Europe, Latin America, and the Caribbean were not only present, but empowered to represent Planeteer Alliance and elevate youth voices on global decision-making stages.

By removing financial barriers, Planeteer Alliance enabled these young leaders to bring lived experience, regional perspectives, and youth-driven solutions into critical conversations on climate, policy, and global development—demonstrating a clear commitment to meaningful youth participation beyond symbolism.

Renson Nyongesa (Kenya) attended the Pan African Universities Debate Championships in Johannesburg, South Africa.

Maria Victória Pessoa (Brazil), Dejea Lyons (Cayman Islands), and María Fernanda Buenaventure (Mexico) and Becca Bullen, Planeteer Alliance Program Manager attended COP30 in Belem, Brazil.

Bocarr Sowe (The Gambia) attended the West Africa Youth Impact Summit held in Banjul, Gambia.

Julius Dady Kirungi (Rwanda) attended the Africa Climate Summit 2 (ACS2) in Addis Ababa, Ethiopia

Zara Hawkins (United Kingdom), Ashton Hawkins (United Kingdom), Dejea Lyons (Cayman Islands), and Diego Arreola Fernández (Mexico) attended the INC 5.5/2 in Geneva, Switzerland.

“The most encouraging part of ACS2 was witnessing youth leadership in action. Seeing young people take charge of climate projects reminded me why Planeteer Alliance exists— to empower youth to turn their ideas into real solutions.”

- Julius Dady Kirungi, Wisdom Council, Rwanda

WISDOM COUNCIL LEVEL

Serving as Captain Planet Foundation's official youth advisory committee, the Wisdom Council represents the highest level of achievement within the Planeteer Alliance. Composed of 10-20 diverse and highly engaged community members, the Wisdom Council provides ongoing insight and guidance to shape pathways within Planeteer Alliance, helping to build a more connected, cohesive, and truly unified global network of Planeteters.

"In 2025, the Wisdom Council influenced youth-led initiatives, mentored Planeteters and supported impactful campaigns through guided planning and execution efforts. Overall, the Wisdom Council empowers young climate leaders, amplifies their voices within the Alliance and ensures that Planeteer activities remain relevant, inclusive and action-driven."

- Oluwatoke Faeji, Wisdom Council, Nigeria

In 2025, its 15 leaders facilitated the virtual trainings for WIND Summit Hosts, modeled meaningful engagement on the PlaneteerHQ platform, and led the planning, marketing, and research for their own virtual convening, *AI and The Environment: Harnessing Potential, Navigating Pitfalls*.

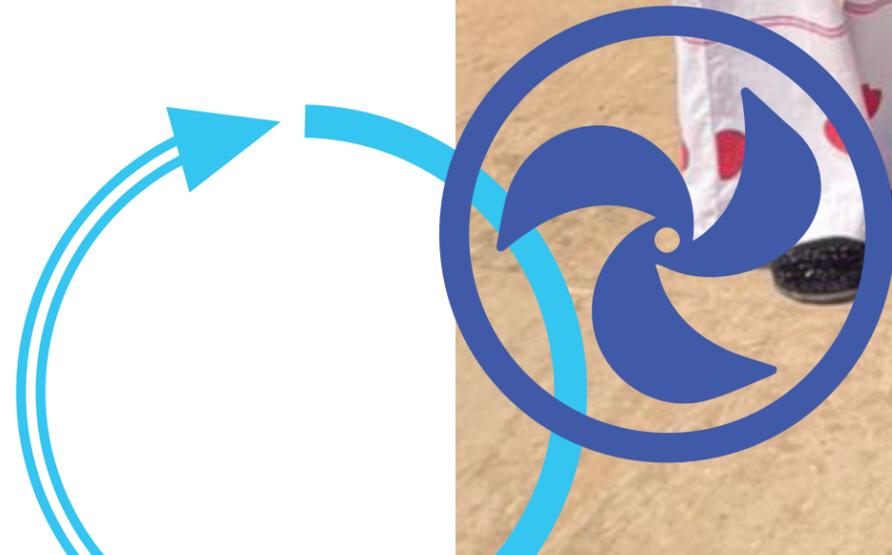

MORE 2025 HIGHLIGHTS FROM PLANETEERS AROUND THE GLOBE

UNEP PLASTIC POLICY 6-MONTH INTENSIVE PROGRAM

Building on the UNEP-funded Plastic Policy Training offered at the end of 2024, **Captain Planet Foundation launched a six-month Tide Turners Plastic Policy Cohort to support 37 youth leaders in Ghana and The Gambia** who joined for monthly virtual training sessions led by regional experts and CPF staff. Sessions covered policy fundamentals, power mapping, the UN Global Plastics Treaty, campaign tactics, and effective pitching. The cohort culminated in a Policy Pitch Symposium, where participants presented their policy recommendations to professionals and stakeholders working in the environmental and policy fields.

Drawing on feedback received during the symposium, youth leaders from The Gambia met with their Ministry of Environment in Fall 2025 to deliver formal, youth-led policy recommendations to their government—marking a critical step in translating training and advocacy into real-world policy action. The Ghana policy cohort will submit their recommendations in Summer 2026.

MORE 2025 HIGHLIGHTS FROM PLANETEERS AROUND THE GLOBE

PLANETEER CLUBS

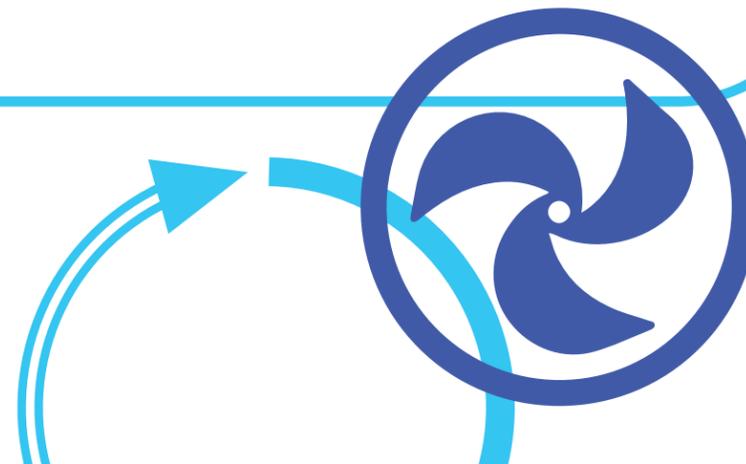

In the past year, the program supported 14 Planeteer Alliance Clubs across six countries—Bangladesh, Canada, Kenya, Mexico, Nigeria, and Zambia. With a direct investment of \$8,000, these clubs were equipped to implement projects, host events, and expand their impact within their communities, extending Planeteer Alliance’s global reach while keeping youth voices, knowledge, and solutions at the center of environmental action.

iALUMBRA LA PAZ, MEXICO CLUBS

Planeteer Alliance partnered with iAlumbra Foundation and its network of NGOs to expand youth-led environmental action in La Paz, Mexico. Through this collaboration, four Planeteer Clubs were launched with local organizations—Ándale La Paz, Ecology Project International, EcoXipe, and Raíz de Fondo—creating new hubs for environmental education, leadership and community engagement. In June 2025, Planeteer Alliance conducted four Bootcamp trainings and a WATER Meetup that brought youth and community members together to discuss local water challenges and explore solutions specific to La Paz.

Building on this momentum, youth leaders organized and hosted a WIND Summit in July 2025 as part of the 2025 WIND Summit Series convening 38 youth participants for hands-on workshops, expert speakers, and interactive activities focused on circularity and the urgent need to reduce plastic waste.

Youth in La Paz have remained actively engaged in Planeteer Alliance programming, continuing to host community Meetups and lead local environmental initiatives. **In November 2025, this partnership reached a global stage when Becca Bullen, Program Manager, and Natalia Moragrega, Regional Coordinator for Mexico, traveled with a youth representative from a La Paz club to COP30 in Belém, Brazil, amplifying youth voices from Latin America in international climate conversations reinforcing the program’s local-to-global impact.**

MORE 2025 HIGHLIGHTS FROM PLANETEERS AROUND THE GLOBE

Captain Planet Collective

In 2025, the Planeteer Alliance Program began planning and development for a new initiative launching in January 2026: the Captain Planet Collective, a Green Economy Workforce Development Program powered by Accenture. Designed for young people seeking careers that support both their futures and the health of the planet, **this five-month program will serve emerging professionals ages 18–25 from the United States, Canada, and Latin America.**

CNN Call To Earth Day

CNN International called on the Planeteer community to help lead the way for “Guard Your Green Space,” November 17, 2025. Planeteers across the world expressed how they care for and protect their cherished green spaces in their community through micro-grants powered by Planeteer Alliance.

OUR FINANCIALS

How we Spend our Dollars

Captain Planet Foundation prides itself on efficient spending to maximize investment in support of our mission – working collaboratively to engage and empower young people to be problem solvers for the planet. In addition to grant dollars and donations, we receive generous in-kind support, including rent, contract services, and other goods and services from several organizations. **Including these in-kind donations in our functional spending, 73 cents of every dollar raised goes directly into the programmatic work of the organization.**

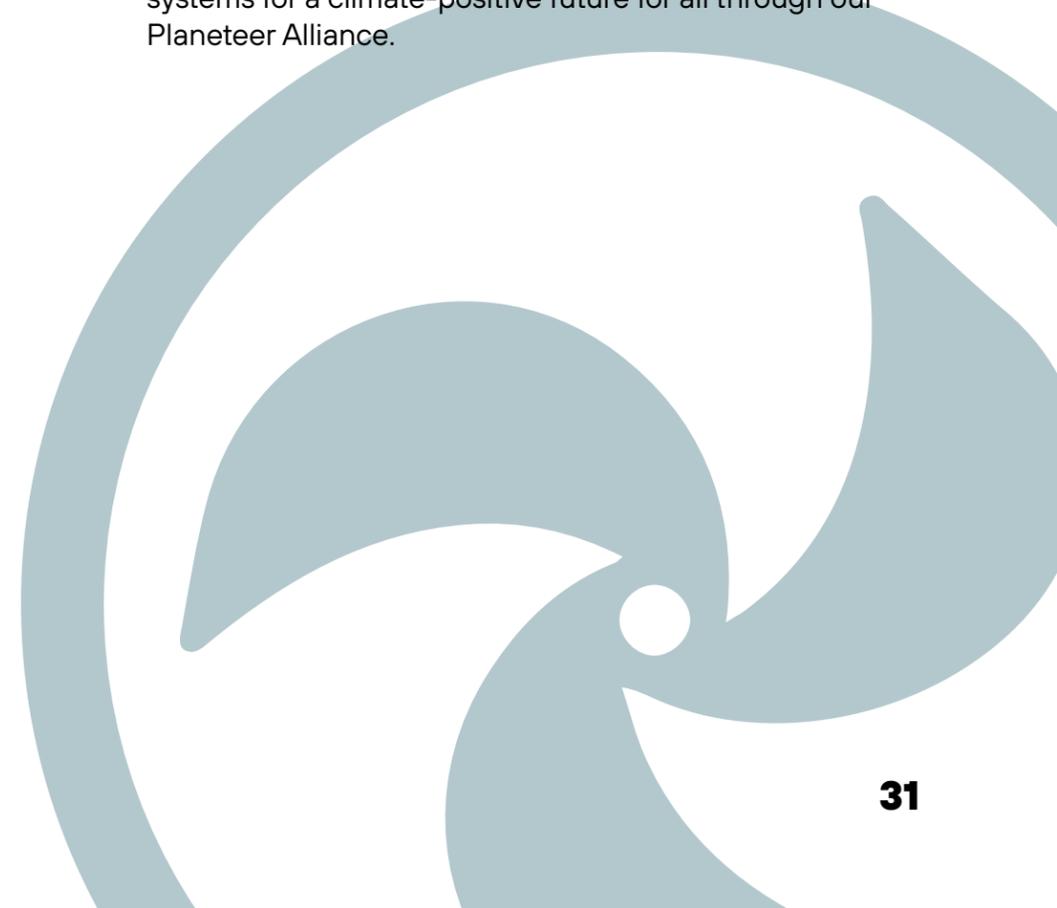

How we Invest

CPF's operating programs provide direct service to both educators (Project Learning Garden & Green Heart STEM Challenge) AND youth (Planeteer Alliance). Across these three programs, the organization advances the role of environmental education while spotlighting and funding exemplary, replicable, solution-based projects designed by young people across the globe.

TO THAT END, CPF HAS SPENT THE LAST DECADE:

- Taking the best ideas to scale through the development of outdoor living laboratories as instructional spaces and lessons in our Project Learning Garden program.
- Investing in the incubation of equity-driven environmental projects, designed by young people, that result in measurable benefits to local natural systems and communities through our Green Heart STEM Challenge.
- Investing in the training, mentoring, and amplification of activated young people who are working to redesign systems for a climate-positive future for all through our Planeteer Alliance.
