

YOUNG CHANGEMAKERS A WORKSHOP FOR RIVER ACTION

*A One-Day Student
Workshop to Find Your Voice
and Create Change*

**workshop does not include canoeing - sorry!*

The rivers and lakes of Minnesota are iconic - they define the state and the life, both human and otherwise, that inhabit the land. But the freshwater systems of Minnesota are under pressure and need your help. Will you become an active champion and defender of your rivers?

The Captain Planet Foundation, in partnership with Wilderness Inquiry, is proud to host the Green School Conference & Expo Student Summit. This unique opportunity will bring together the champions and defenders of Minnesota's rivers along with local scientists, activists, and youth leaders who all work with the rivers. By the end of this workshop, a day of collaboration and creativity will have helped YOU define and develop a campaign for change in your own community.

There are only FORTY (40) SPOTS available for this Summit, so only the most passionate young changemakers will be in the room. The deadline to apply is March 22nd - APPLY TODAY!! *[scholarships available & lunch provided]*

SCHEDULE April 8, 2019

*We look forward to
seeing you at the
Student Summit in
St. Paul, MN!
#GSCE19*
